VI—LAND SETTLEMENT

No. 29—Land Settlement on the 30th June, 1960

Particulars	Area	Area
I.—Absolutely Alienated :— Area sold by public auction or other forms of direct sale or otherwise alienated up to 30th June, 1960	acres	acres
.....	27,343,902
II.—In Process of Alienation on 30th June, 1960 :—		
Free Homestead Farms	331,383	
Conditional Purchase	11,102,490	
Selections under the Agricultural Lands Purchase Act	273,192	
Grazing Land	976,062	
Town and Suburban Lots	3,725	
Crown Grants of Reserves	71,955	
		12,758,807
Total Area alienated or in process of alienation on 30th June, 1960	40,102,709
III.—Leases or Licenses in Force on 30th June, 1960 :—		
Issued by Lands Department :		
Pastoral Leases	216,908,871	
Special Leases	4,271,305	
Leases of Reserves	916,246	
Residential Lots	4,595	
Perpetual Leases	1,431,126	
Issued by Mines Department :		
Gold-Mining Leases (a)	18,936	
Mineral Leases (b)	40,337	
Miners' Homestead Leases	33,727	
Issued by Forests Department :		
Timber Permits (c)	4,024,720	
		227,649,863
		356,836,228
IV.—Area Neither Alienated, in Process of Alienation, nor Leased	624,588,800
Total Area of Western Australia

(a) Exclusive or 494 acres on "Private Property." (b) Exclusive of 2,006 acres on "Private Property."
(c) Includes Permits for cutting Wandoor for tanning purposes, amounting to 153,014 acres, but excludes Permits and Licenses for cutting timber and firewood in Goldfields areas.

No. 30—Principal Crown Lands Transactions—Area of Crown Lands for which Applications have been approved by the Lands Department

(a) Includes Free Homestead Farms and Reserves.

VII—PRODUCTION

No. 31—Estimated Net Value of Western Australian Production

For Primary Industries, net value of production is derived by deducting all marketing costs and the value of goods used in production (seed, fertilizer, pickling, sprays, dips, fodder, fuel and oil, etc.) from the value realized "at the principal market." For Manufacturing, it is obtained by deducting the value of goods consumed in the process of production (i.e., materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced and containers and packings) from the selling value "at the factory door."

Year	Agricultural	Pastoral and Trapping (a)	Dairy, Poultry and Bee Farming	Forestry and Fisheries	Mining and Quarrying	Total Primary	Manufacturing

No. 45—Housing (Rents of Four-and Five-roomed Houses)—Five Principal Towns

Variations in the Rents of four-and five-roomed Houses in the five principal Western Australian towns are shown in the following table. The Index numbers are based on returns received from house agents for ordinary unfurnished dwellings, in a good state of repair with ordinary conveniences and occupying fair situations.

§ Annual Declaration. (a) Defined for basic wage purposes as the area comprised within a radius of 15 miles from G.P.O., Perth. (b) As defined in the Land Act but excluding the Metropolitan Area. (c) Rates for divisions shown not specifically declared by Court. (See letterpress in June, 1942, issue.) (d) Relates to certain specified Goldfields Districts only. (e) Rates declared in Basic Wage Adjustment and Order No. 1 issued under the authority of National Security (Economic Organization) Regulations. (f) Beginning of first pay period. (g) Beginning of next succeeding pay period. (h) Interim Basic Wage declaration authorized under amendment to National Security (Economic Organization) Regulations, operative first pay period after date thereof. (i) Special determination incorporating increase of £1 for males and 15s. for females. (j) Female rate increased to 65 per cent. of male rate as from 1st December, 1951. (k) Female rate increased to 75 per cent. of male rate from beginning of first pay period commencing on or after this date.

No. 48—Minimum Rates of Wages payable to Adult Workers under Awards of Arbitration Authorities and Industrial Agreements, as at 30th June, 1960

Rates relate to the Metropolitan Area except where otherwise stated, and are shown to the nearest farthing

No. 50—Notes on the Rainfall and General Weather Conditions in Western Australia during April, May and June, 1960

April

General—During April anticyclonic influences were strong in the sub-tropics and although an extensive southern depression brought general rain northward of the Gascoynes on the 6th and 7th there were later instances wherein tropical low-pressure troughs formed along the west coast only to be thrust aside by vigorous high-pressure systems moving in from the Indian Ocean.

In the tropics low pressure was weak following upon the two cyclones in March and little rain eventuated during the first three weeks. A cyclone over the Arafura Sea on the 20th gave promise of further tropical rains as it moved south-west, but having gained the Timor Sea it lost intensity.

Rainfall—Scattered rains mainly due to thunderstorms were received in the tropics during the first three weeks of April but falls exceeding an inch and ranging up to three inches were reported from the Kimberleys after the 20th due to the influence of a short-lived cyclone over the Timor Sea.

On the 6th and 7th a large southern depression produced rain as far north as the East Gascoyne divisions but registrations were mainly light except in the lower south-west where Bunbury received 188 points in 24 hours, a record day's total for April.

Little rain was received during the remainder of the period except in the lower south-west and south and the agricultural districts generally were looking for opening rains at the close of the month.

Temperature—Extreme heat prevailed throughout the tropics and Gascoynes and extended to many places in the sub-tropical areas during the first week of the month, when the highest maximum temperature reported, 104°, occurred on four consecutive days at Port Hedland and twice at Talgarno and Roebourne respectively. These figures represented a departure of 11° above the normal day temperature but minimum or night registrations showed even greater departures in the East Gascoyne and places as far south as the southern wheatbelt where a number of recordings exceeded the average by 10°–16°.

As a contrast to these, a series of waves of cold air passed across the sub-tropics during the last week of the month and day temperatures fell 15° below the normal at many places, ranging up to 19° below at Cue.

The night temperatures were the lowest recorded in April at several stations from the Metropolitan area to the Gascoynes and Goldfields and many stations reported night temperatures which closely approximated their lowest April recordings. Temperatures ranged from 104° at several tropical stations early in the month to 30° at Wandering on the 30th.

Metropolitan—In Perth the rainfall in April was below average to the extent of 118 points, but the falls over the previous three months more than compensated for this as the total to the end of April was nearly an inch above the average for the four months' period.

Temperatures early in the month were high, reaching 82.6° on the 4th but towards the close of the month the Metropolitan area participated in the series of cold waves that passed across the State and on the morning of the 27th the minimum fell to 40.6° which is the third lowest minimum recorded for this month.

On the 25th the maximum temperature did not rise above 62.3° and on the 26th 63.1° and 27th 64.2°. These low readings may be compared with the lowest maximum recorded for April—58.6°.

May

General—High pressure predominated during the first half of the month extending on occasions to the tropical divisions. Two small depressions formed off the Kimberley coast in the second week and, on occasions, low-pressure troughs formed along the west coast or southern depressions intruded in the south-west. Except in the tropics either the troughs were thrust aside or the depressions were restricted by anticyclonic influences.

On the 17th the distribution of pressure changed and during the third week a series of low-pressure centres operated over the sub-tropics in various forms culminating, on the 26th, in a vast southern disturbance which extended northward to embrace all sub-tropical divisions. This in turn passed eastward by the 29th to be followed by a rather energetic anticyclone which caused a return to fine, cold though cloudy weather for the remaining days of the month.

Rainfall—In the Kimberleys good rains were received in the first half of the period when falls ranging up to 370 points at Sunday Island, 271 points at Wyndham and more than two inches at other stations were reported. In the remainder of the tropics however and in the East and West Gascoyne divisions little, if any, rain occurred.

During the second fortnight, due to the northward extension of southern low-pressure, light rains were received in the De Grey, Fortescue and both Gascoyne divisions and on the 26th, from the same source, the De Grey received excellent falls ranging up to 210 points at Bamboo Springs and 186 points at Bonny Downs; the Fortescue received falls up to one and three-quarter inches at several stations and an outstanding three inches at Roy Glen.

South of the tropic the agricultural districts obtained light amounts at fairly regular intervals early in the month which served to keep the green feed going. After the 19th however good general rains were received during the following week which, over the seven days, totalled one and a-half to two inches in the outer wheat belt and between two and two and a half inches ranging up to three inches at places in the central and parts of the southern wheat areas.

The falls, however, were only light in the North-Eastern and South-Eastern divisions and, although in the latter the seasonal position was already established, the North-Eastern division and Northern Goldfields still required good rains to assist pastures.

The rains extended to the West and East Gascoynes where light to moderate amounts were received.

Temperature—Day temperatures were below normal throughout the tropics during the month and minima or night temperatures showed a similar tendency but more particularly in the latter half.

The formation of low-pressure troughs on the west coast caused day temperatures to rise at times in the sub-tropics and the presence of cloud, more particularly in the third week, lifted minima above normal but otherwise temperatures were below normal particularly in the southern half and frosts, severe at times, were reported from the central and southern agricultural districts and south-west and south coastal areas.

The lowest minima were registered at Wandering where 28° was experienced on 7th, 29° on 13th and 30° on 16th.

The highest maximum was 96° at Fitzroy Crossing on the 2nd.

Low day temperatures were experienced during the middle and the last week of the month. On the 27th, the maximum temperature at Mount Barker did not rise above 51°—12° below normal. This disparity was reached at a number of other stations as far north as Wiluna and Meekatharra during the period, the last named registering only 60° on the 29th which is 16° below the normal expectancy at this time of the year.

Metropolitan—In Perth the rainfall for the month was 33 points above the normal, the total being 533 points which fell on 13 days.

Day temperatures exceeded the normal on only six days and failed to rise above 61° on four occasions, on two of which the mercury reached only 60°. The night readings exceeded the normal on only seven occasions, and the mean for the month was the lowest recorded for May.

The mean temperature—57.7°, was the second lowest for this month.

June

General—In contrast to the previous June, there was almost a complete absence of winter-type southern depressions. An occasional complex low-pressure distribution off the west coast formed small centres, some of which later developed into sizable depressions to the south or east, but it was not until the 26th that the main southern low-pressure belt extended northward sufficiently to encompass the southern half of the State.

Rainfall—The tropics and Gascoyne received little rain during the month. Light falls however extended from the agricultural areas through the Gascoyne to the Fortescue and De Grey divisions at times, and there were one or two recorded in the West Kimberley early in the month.

The formation of small centres of low pressure off the south-west coast caused heavy local rain in the south coast divisions about the middle of the month, but outside this region, although falls were fairly frequent—particularly in the first fortnight—they were comparatively light. Useful falls were received in the Fortescue and at a few places in the Gascoyne, otherwise rainfall in the tropics and sub-tropics was not of much value. In the agricultural area, although totals were generally well below normal, they were sufficient for most crops.

Temperature—Day temperatures were above normal during the first week and mainly below normal during the remainder of the month. They ranged from 93° at Fitzroy Crossing on the 6th to 50° at Mount Barker and Katanning on the 14th. Low temperatures were general in the South-West and South-Eastern divisions about the middle of the month when the maximum recorded at many places in the southern districts was below 60° for four successive days.

Night temperatures were about normal, the minima ranging from 79° at Kalumburu in the far north to 26° at Bridgetown and Wandering in the lower south-west.

In the second half of the month temperatures fell to freezing point somewhere in the State on 14 of the 15 days and some centres experienced heavy frosts. There were 13 at Rawlinna during this time, and at Mundiwinda, almost in the tropics, there were 5 during the last 6 days of the month.

Metropolitan—Although there were nearly the normal number of wet days in June, there were no particularly heavy falls, and the month's total of 444 points was nearly three inches below normal.

Temperatures were more frequently below normal than above, and although no day was particularly cold the mean temperature for the month was one of the lowest recorded.

There were no particularly strong winds and the maximum gust of 50 m.p.h. was rather lighter than is usual in June.

There were no particularly strong winds and the maximum gust of 50 m.p.h. was rather lighter than is usual in June.

There were no particularly strong winds and the maximum gust of 50 m.p.h. was rather lighter than is usual in June.

XVI—BUILDING OPERATIONS

No. 55—New Buildings Completed

The figures in this table cover the operations of all builders who accept contracts for the construction of new buildings, "day labour" building by governmental agencies and the activities of "Owner-Builders." The term "Owner-Built" refers to buildings actually erected by the owner or under the owner's direction without the services of a contractor who is responsible for the whole job.

The value of land on which the buildings were erected is not included in the values shown.

Total, Census, 30th June, 1947	258,076	244,404	502,480	124,767	2,606	127,373		

(a) For the purpose of the Census, a "dwelling" is any habitation occupied by or for occupation by a household group living together as a domestic unit, whether comprising the whole or part of a building. The term has, therefore, a very wide reference and includes, in addition to houses and flats, a great variety of "dwellings" ranging from a single-roomed shack to a multi-roomed hotel or institution.

(b) Persons (both passengers and crew) not enumerated elsewhere who at midnight between the 30th June and the 1st July, 1954, were on board ships or were travelling on long-distance trains or aircraft.

(c) Represents population at Census, 30th June, 1954, plus natural increase and recorded net migration since that date. Figures subject to revision after the next Census.

No. 62—Employment

FACTORIES

Index numbers showing the trend in Factory Employment since 1950
